BENNETT TO TAKE PART IN CAMPAIGN

Latest word from Ottawa is to the effect that Mr. Prime Minister's Health has been almost completely restored. After his trip to England to take part in the celebration of the King's silver jubilee he plans to resume his duties as government leader in the House of Commons. He will take charge of the reform legislation arising out of the Price Spreads Commission report, and he is confident that he will be able to undertake the arduous task of conducting the federal campaign in the interests of this party.

The announcement of these plans will be welcome news not only to his followers throughout the country but to Canadians as a whole, who appreciate the great strain he has been under during the past five trying years and who value the magnificent devotion he has shown in the study and solution of pressing national problems. More and more it is being recognized that he is the one statesman who has the thorough grasp of public questions and the initiative to lead Canada out of the depression.

For some time rumors have been broadcast that Mr. Bennett would not be able to lead his party in the coming general election campaign. The seriousness of his condition was exaggerated by those who, for political reasons, would like nothing better than his retirement. The present outlook, happily, is that they will be disappointed.

CRITICS OF "SOCIAL CREDIT"

Editor of the Western Globe, Mr. Abernethy the other evening over the radio presented a very plain and moving picture of a starving cow staggering around a fenced hay stack. He gave this as an example of tearing down the fence placed around goods by capital. In using this example Mr. Abernethy failed to acquaint us with all the facts.

1. Did the cow or its owner put up the hay?

2. Is the cow of any potential value? Would it produce beef, milk, or even a good hide?

3. Was the cow loose in summer or winter?

4. If the cow was let into the stack would it (a) Gorge and thus kill itself or (b) Having been turned into the stack would it waste so much that it would still starve to death before Spring?

5. If the stack was put up to feed a cow or cows which are producing milk or beef, would (a) The destruction of this hay be just enough to run the cows short of feed and reduce their production; (b) the loss of this hay starve the producing cow?

While I admit it is very unfortunate for the starving cow, still if its owner had made proper provision the cow would not be staggering loose in the midst of winter's gales around a fenced stack of hay miles from human habitation.

It has just occurred to me that if Messrs. Douglas and Abernethy were at the stack the cow, having its own clothing and shelter, might still starve to death while they discussed the method of distributing feed.

BOXING TOURNAMENT THURSDAY, MAY 2nd

Final arrangements are now complete; all fighters have signed on the dotted line, and will be here on Thursday evening, May 2nd to put on a program of boxing that will long be remembered by fight fans. "Tex" Toller has spared no time nor expense in providing the very best ring performers in the province. Fight fans are in for a great treat on May 2nd when all these top-notchers will gather here to swap punches for the prize of the tournament. Most of the men signed on for this card are well and favorably known to fight fans of the province and the ability of these fighters is undisputed. Each fight on this big card is a head-liner in itself—no "punches".

From the curtain-raiser of 4 fast rounds to the wind-up of 10 rounds there are 40 thrilling rounds of top-notch fighting.

The main event of the card will be the Wellersweight battle between Pete Holm, of Lacombe and Morris Pickard, of Montreal. Pete Holm needs no introduction here—he is a first class fighter, and is in the very pink of condition. Since his last appearance here, Pete has fought many fights and has not been defeated. Several of his fights took place in the Empire Theatre at Edmonton, on the same card with Ed. Wenskob and other fighters of renown. Pete always gave a good account of himself and was always popular with the fans. Morris Pickard, of Montreal, comes here highly recommended, and judging from his record, he will give Pete a good battle. This will be a hard-fought battle, as a winner of the 1934 Canadian title, Young Dempsey, "The Alberta Mauler" is a real tough young bird with lots of sand

here, with blood in his eye and what he says he will do Langley will certainly make this an Al scrap. "Heartless" has knock-out drops in both fists and what he can do with a pair of boxing gloves will be a revelation to fight fans. This bout will be worth coming miles to see. Langley promises a stiff opposition to anything and all that McMaisters can put across.

Battling Fred Dobrstein, the fighting blacksmith will meet Fighting Charlie Swanson, the battling miner in a four round duel. Dobrstein has featured in several matches here and is well known to fight fans. Charlie Swanson is a great little brawler and should make things pretty interesting for Fred. This is sure to be a fast-traveling bout.

The 4-round curtain-raiser between two promising young brawlers who are known as Young Dempsey and Young Fitzsimmons will be a hard-hitting 4-round battle. Young Dempsey "The Alberta Mauler" is a real tough young bird with lots of sand

PETE HOLM, of Lacombe, who will fight Red Deer here on Thursday.

feature in the Main Event of the Big Boxing Card here on Thursday.

McNeill, of Lacombe, who will fight Red Deer here on Thursday.

Which also goes for Young Fitzsimmons "The Irish Terror." Four rounds of peppy fighting is promised when these two meet.

So, there you are, fans! Just look over the above list of top-notchers and then you will realize just what a great evening is in store for you. All bouts will be well contested and will be on the level. Every man will fight his opponent to a finish. It will be a rare opportunity for fight fans to see their favorites in action, and from reports, there will be a second attendance.

Bob Fox, of Willesden Green, former Light Heavyweight Champion of Western Canada, will referee the different bouts. Bob is well qualified for the job, having had many years of experience in the ring. All fans can be assured that all Bob's decisions will be fair and impartial. Tickets are now on sale in Lacombe at T. J. Hampson's office in The Western Globe building. Ring Side seats sell for \$1.50, including tax; while Rush Seats sell for \$1.00, including tax. Get your tickets now while you have a good choice of seats. The fight will be well worth the price of admission. Don't miss it—you will get your money's worth and then some.

SPRUCEVILLE NEWS

Don't forget the play on Friday night the 26th entitled "Her Step Husband," presented by Lacombe United Church Young People at 8:30. Dance afterwards, music by Clark's Orchestra.

Mrs. Dancock and son Billie, of Calgary are spending Easter week with her parents Mr. and Mrs. Sam English.

Mr. and Mrs. W. J. Barnes spent Sunday with Mr. and Mrs. Larson, at Blackfalds.

Master George and Marie Orme of Red Deer are spending "Easter vacation" with Elmer Rose and Mary Young.

The Juniors are giving a dance in the hall on Friday evening, May 8th. Music by Hughes' Orchestra.

Mr. O. S. Young attended a meeting at Wetaskiwin on Wednesday.

Miss Stella Bradley and Miss Phyllis Rice are attending "The Teacher's Convention," in Edmonton this week.

BOARD OF TRADE

Seventy members of the Lacombe and District Board of Trade met for their regular meeting in the dining room of the Adelphi Hotel on Tuesday evening at 6:30. After dinner Pres. H. B. Tramp called the meeting to order and the regular business was entered into. Secretary Jesse Fraser read the minutes, and informed those present that the membership was increasing rapidly, members now numbering 117. Various questions affecting the town and district were brought up. The matter of beautifying the cross-roads corners in the country was spoken for by Mr. Chas. Abbott; the offering of a prize for the most tastefully arranged mail box on the rural routes came in for some discussion; the celebration of May 6th was taken up but no definite arrangements were made. Mr. Marble brought up the matter of the U.F.A. and Communist groups.

Under the decision the candidates will be known as "Labor candidates, and not Labor-C.O.F." The meeting was marked by an announcement by Dr. W. R. McNeill, professor of the University of Alberta, that he was withdrawing from activity in the Canadian Labor Party because of a recent decision by the University of Alberta board of governors. The board last January ruled that its employees; could not participate in provincial politics or run as a federal candidates, then later suspended the order for a year. The Legislature this week failed to pass a bill which would have barred the board from power to make such decisions.

Dr. Alexander declared that the suspension for a year apparently was made for him "I do not propose to accept a gift when a principle is at stake."

Effort on the part of the convention to bar from the Canadian Labor Party any person campaigning for social credit failed, the question being sent to the executive after the delegates had come involved in the merits of what they described as two systems of social credit—Douglas and Abernethy. Miss Amelia Turner, Calgary, was having a busy time with the delegates here, declaring that the Douglas followers had not yet entered the political field.

Mr. Butcher who has been on the sick list (although he said he wasn't) is able to be up and about again.

Church services at Fairview started again on Sunday last (April 21), with Mr. Johnson, of Edmonton, supplying the pulpit. All those who do not care to listen to a real live man had better not come, but those who do will surely miss something good if they stay at home. All the young people up to 10 years of age are especially invited to be present next Sunday at 3 p.m. (April 22). Sunday School will be started soon.

Mrs. Charlotte (M.C.), Miller has been visiting her parents Mr. and Mrs. H. O. Sims for the past week and at the same time recuperating from an attack of flu.

The following news will be late news for Fairview people, but on April 3, a real co-operative enterprise was carried out at the church when the Ladies Aid met in force and went into session on the inside of the Church and the Men's Aid also met in force and went into session on the outside of the church. Don't know exactly what the ladies did at their meeting, but the men sawed up a year's supply of wood and ate, without a single complaint, the dinner which the ladies provided.

The Mission Band held its meeting on Saturday 21st at Mr. and Mrs. Brown's. The place and time of their next meeting will be announced later.

FIRE INSPECTION Chief Bill Sage of the local Fire Department announces that an inspection will be made shortly of all premises within the fire zone by members of the department for the purpose of familiarizing themselves with the layout of each building in case of fire. This inspection is part of a regular system employed in all well organized fire departments and owners of premises are requested to co-operate with the chief and his men in this work. Any suggestion for the improvement of fire fighting conditions offered by the department to owners of premises would be accepted in the spirit of efficient protection against fire.

SILVER JUBILEE CELEBRATION, MAY 6th Sports for Boys and Girls in the afternoon. Football, Baseball, Big Bonfire and Fireworks in the evening and two Dances and Card Party. FREE. Everybody come and celebrate. Watch for further announcements.

AT THE AVALON Big Double Feature, Buck Jones in a thrilling story of the R.C.M.P. "McKenna of the Mounted", also Ronald Coleman in "Masquerader". Two men who so closely resembled each other that one stepped into the fighting political career and love of the other man's wife provide the famous dual role of "The Masquerader" for Ronald Coleman at the Avalon Theatre.

Involved in the puzzled affection and loves of Coleman's two roles are Blaise Landi and Juliette Compton and a big cast headed by David Torrence, Helen Jerome Eddy, Creighton Hael and Halliwell Hobbes.

As a background for Coleman and the strange human problem of "The Masquerader," Samuel Goldwyn has provided a production that give new life and a bright, modern touch to the famous English melodrama. Political turmoil, riot and the threat of revolution, financial and government crises taken from today's headlines are the storm clouds that drive one man from his position at the helm of state and from the love of his wife to drugs and debauchery. Pride of family, patriotism and love of adventure and fight summon his unknown young cousin to the rescue.

His two roles give Coleman an opportunity to contrast drunkenness and sobriety, sanity and fitness with debauchery and depravity. Unlike "Dr. Jekyll and Mr. Hyde" and other famous dual roles of the stage and screen "The Masquerader" offers Coleman no important help in the way of makeup. His triumph is acting, not make-up.

COMING: Wallace Beery in one of the best roles of his career "Viva Villa," May 2, 3 and 4.

CLEAN-UP WEEK

The week of April 29th to May 4th has been designated as Clean Up Week in Lacombe. Citizens are requested to place all inflammable material in one place for removal to a motor bonfire which will be burned on the evening of May 6th in celebration of the King's Jubilee. Other material will be well removed to the nuisance ground. Citizens are asked to co-operate with the Town officials in this work.

LABOR DROPS U.F.A.

EDMONTON—Canadian Labor Party, Alberta branch, in convention here last night, decided to contest the coming provincial election under a straight Labor banner with an announced platform based on the C.C.F. manifesto, it turned down a suggestion that "co-operation" be sought with the U.F.A. and Communist groups.

Under the decision the candidates will be known as "Labor candidates, and not Labor-C.O.F." The meeting was marked by an announcement by Dr. W. R. McNeill, professor of the University of Alberta, that he was withdrawing from activity in the Canadian Labor Party because of a recent decision by the University of Alberta board of governors. The board last January ruled that its employees; could not participate in provincial politics or run as a federal candidates, then later suspended the order for a year.

The Legislature this week failed to pass a bill which would have barred the board from power to make such decisions.

Dr. Alexander declared that the suspension for a year apparently was made for him "I do not propose to accept a gift when a principle is at stake."

Effort on the part of the convention to bar from the Canadian Labor Party any person campaigning for social credit failed, the question being sent to the executive after the delegates had come involved in the merits of what they described as two systems of social credit—Douglas and Abernethy. Miss Amelia Turner, Calgary, was having a busy time with the delegates here, declaring that the Douglas followers had not yet entered the political field.

FAIRVIEW DOIN'S

Mr. Butcher who has been on the sick list (although he said he wasn't) is able to be up and about again.

Church services at Fairview started again on Sunday last (April 21), with Mr. Johnson, of Edmonton, supplying the pulpit. All those who do not care to listen to a real live man had better not come, but those who do will surely miss something good if they stay at home. All the young people up to 10 years of age are especially invited to be present next Sunday at 3 p.m. (April 22). Sunday School will be started soon.

RIMBEY NEWS

Messrs. J. Barr and W. H. Munro of the Bank of Montreal staff were motored to Edmonton on Saturday to spend Easter in the city. Miss Clara Byers and Miss Mary the Byers spent the Easter holidays with Mr. and Mrs. G. E. Byers at Lodge.

D'Arcy Clayton will fight Baden Whitesides at Lacombe at the big tournament on May 2nd.

The Ladies Aid of the United Church held a most successful Easter tea and sale of cooking on last Saturday. Cut flowers, potted plants and ferns were on sale.

The day's receipts totalled \$32.00. Reverend A. Kaufman, a missionary recently returned from Palestine, lectured morning and evening service at the Church of the Nazarene on Easter Sunday. The church was filled to overflowing on both occasions. Reverend Kaufman gave a vivid description of the life work and missions of the various classes of people in Jerusalem, illustrating his remarks with photographs which he had, himself, taken. He wore the colorful silk costume of the native Jewish people.

A program of Easter music prepared by the Church choir was also presented at the services on Sunday, and consisted of solos by Mrs. G. D'Arcy and Mrs. Robert Lewis; duet by Mrs. Bassant and Reverend R. W. Coulter; ladies' quartette; male quartette; mixed quartette and choral numbers of fifteen voices.

The Sunday School service at midday was well attended with 125 members answering the roll call. Special promotion exercises were presented under the direction of the Sunday School superintendent, Mrs. G. A. McCracken.

Mr. Gordon Wright shipped a car load of cattle on Monday from the Rimby and Porche districts, for the Blindman Valley Livestock Association.

Mrs. D. H. Kennedy, A.T.C.M. has announced that Rimby has been named as one of the centers for the examinations of the Toronto Conservatory of Music, to be held later in the Spring.

Mrs. H. E. Halpin and daughter, Constance returned on Tuesday from a two week holiday spent in Edmonton.

Miss Jennie Cook of the Rimby public school staff spent Easter with relatives in Calgary. Miss Esta Stuart is spending the week at her home east of Rimby. Principal and Mrs. J. W. Moroney motored to Red Deer for Easter and Mr. and Mrs. Ottar Masning will spend Easter weeks in Edmonton.

This sacred Cantata "The Lord of Life" presented by the choir of the United Church on the evening of Good Friday was well attended and well received. The choral numbers were beautifully rendered and were interspersed by solo and duets.

Mrs. P. Alter who conducted, took the leading soprano part, and Miss Esta Stuart at the piano, accompanied with skill and sympathy.

Miss Alice DeCoursey has accepted a position as assistant in the office of Mr. W. A. Saunders, the secretary of the municipal district of Blindman.

The M.D. of Last Week No. 431 has passed the by-law pertaining to the furnishing of feed and seed to the farmers by the government. The responsibility of collection of the indebtedness resulting from the municipality to the extent of 50 per cent.

EDMONTON MALE CHORUS

The Edmonton Male Chorus of 50 voices will be at the United Church on Saturday evening, April 27th at 8 o'clock. This is one of the finest musical organizations in Alberta and many of Edmonton's leading vocalists are members of this organization. Miss Helen Harbour, formerly of Lacombe is the soloist of the evening. This is a great opportunity to hear a truly good male chorus and all music lovers should make an effort to attend.

THE CHURCH OF ENGLAND IN CANADA

Diocese of Calgary. St. Cyprian's Church, Lacombe. Incumbent: Rev. T. H. Chapman. Organist: Mrs. L. D. Wright. April 28th, 1st Sunday after Easter 10:30 a.m. Sunday School. 11:00 a.m. Morning Prayer and Sermon. 3:00 p.m. Holy Baptism by appointment. 7:30 p.m. Evening Prayer and Sermon.

TO BE KEPT IN MIND: May 11-12, Boys and Girls Vocational Conference at Red Deer. Watch for posters. Plan now to be there.

May 12, 7:30 p.m., Confirmation. May 23-25 Young People's Conference, Calgary. July 2-6, Diocesan Summer School at Banff.

For made-to-measure Suits and Overcoats we are showing a large range of samples in newest cloths and patterns to select from. Prices \$22.50 up, let us show you.

D. Cameron

TOWN OF LACOMBE

NOTICE is hereby given that the council of the Town of Lacombe at its regular meeting held February 18th, 1935, by resolution as provided in section 230 of the Town & Village Act, 1934, adopted the 1934-35 assessment of rates for improvements, businesses, professions etc., and the same will be valid in all respects for 1935, subject to the right to appeal. No assessment slips will be sent out in 1935 except in cases where the assessment has been changed from the previous year.

DATED this 23rd day of April, 1935.

LEWIS P. MINKLER, Secretary-Treasurer

NOTICE OF PREPARATION OF ASSESSMENT ROLL

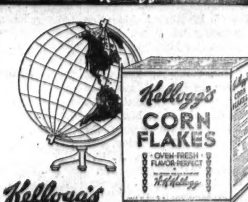

Town of Lacombe Assessment Roll 1935.

NOTICE IS HEREBY GIVEN that the assessment roll of The Town of Lacombe for the year 1935 has been prepared and is now open for inspection at the office of the Secretary-Treasurer from ten o'clock in the morning until five o'clock in the afternoon on every day which is not a public holiday, except Saturday and on that day from ten o'clock in the forenoon until two o'clock in the afternoon, and that any person who desires to object to the entry of his name or that of any other person upon the said roll or to the assessment of any property, must within thirty days after the date of this notice, lodge a complaint in writing with the Secretary-Treasurer.

DATED this 23rd day of April, 1935.

LEWIS P. MINKLER, Secretary-Treasurer

ASK FOR Kellogg's

Why Kellogg's lead the world

Kellogg's are the original Corn Flakes—never sold under any other name. Look for the red-and-green package and get the utmost in value. Kellogg's Corn Flakes outsell all other ready-to-eat cereals, for the simple reason that no imitation can equal their marvelous flavor and crispness.

A special Kellogg's process of manufacture brings them to your table oven-fresh. And they are protected by the Kellogg's patented heat-sealed WAX-TITE inner wrapper. Sold everywhere. Quality guaranteed. Made by Kellogg in London, Ontario.

Kellogg's CORN FLAKES

OVEN-FRESH FLAVOR-PERFECT

"I tried that recipe you gave me for Mustard Plecties Mary, but it didn't turn out at all like yours."

"That's too bad, Jane, I've always had such wonderful results with Keen's Mustard!"

"Oh, I didn't use Keen's!"

"There's your trouble, Jane, right there. Keen's Mustard has the strength, flavour and 'zip' that is not found in any other."

KEEN'S D.S.F. MUSTARD

Made from seed grown especially in the Peak of England. The shells or hulls are removed, all the dross being in the inner part of the seed. A special grading makes the full flavour readily available. In original tins for as little as 10c.

Corbin-Kenn (Canada) Limited, 1000 Montreal Street, Montreal, Que.

WORLD HAPPENINGS BRIEFLY TOLD

The government bill appointing an economic council passed third reading in the House of Commons. There was no division.

The crew of four on a 70-ton motor craft were killed when the boat struck a mine, during the recent Greek revolt, in Salamis gulf.

Fire destroyed the Alberta Wheat Elevator at Kitcoy, Alta. Of 35,000 bushels capacity, built in 1913, it contained 18,000 bushels of wheat and the loss was around \$15,000.

Gerald C. MacGuire, 37, who catapulted into prominence recently in connection with a "Fascist plot" to seize the United States government, is dead.

With 16 new fighting aeroplanes already ordered, the Australian government plans to order another 36 this year and a similar number next year.

Four Chinese were convicted in county court of smuggling opium valued at \$4,000 into Vancouver from the Canadian Pacific liner Empress of Japan last year.

The King has sent \$250, his second donation, to the Implicable Fund, organized to preserve as a national monument the only Trafalgar battleship afloat.

Anticipating enormous crowds in jubilee week, opening May 6, about 250 tea shop managers held a series of meetings in London to discuss ways and means.

Between 10,000 and 50,000 Australians are expected to visit England this summer for the jubilee celebrations and a considerable proportion of these will travel by way of United States or Canada.

Emphatic denial of reports that the government is proposing to bring down legislation to extend by possibly two years the life of the present Alberta legislature, which is scheduled to end next June, was made in the legislature by Premier R. G. Reid.

Claims Ownership Of Oldest Spinning Wheel

Nova Scotia Woman Using One Made In 1815

Controversy over who owns the oldest spinning wheel in use in Nova Scotia has found one claimant to the title in Lower L'Ardoise. Some time ago it was pointed out that Mrs. Donald Cameron of Sugar Lake, Victoria county, Cape Breton, owns a spinning wheel which was made in 1815 and has been in use ever since the battle of Waterloo. It was pointed out at that time that his spinning wheel was the peer even of the wheel in the museum at Halifax.

Mrs. Ben J. Birette of this place owns a spinning wheel which was made by Alexander McIntosh in 1812, making it three years older than that owned by Mrs. Cameron. The wheel owned by Mrs. Birette is in use daily and is in excellent condition. A wheel made in 1822 for a Mrs. Chisholm of New Glasgow became the property of her daughter, Anna, who gave it to her niece, Mrs. A. K. Baillie, Halifax, the present owner.

China's Amelia Earhart

Malaya now has an Amelia Earhart, too. She is 30 years, and her name is Miss Wong Chiew Wan. She is the only Chinese woman pilot in Malaya, and took up flying at the beginning of last year. She recently carried out a successful flight from Kuala Lumpur to Singapore, and has now added to her laurels by making a solo trip from Kuala Lumpur to Penang.

Marathon Runner (coming in an easy list)—Did you take my time? Timekeeper—I didn't have you. You took it yourself.

There's A Reason

Interesting Explanation Of Place Names For Points On Vancouver Island

(By Frank Glenna)

Place names are not like Topsy. They didn't just grow, nor are they picked at haphazard out of a hat. There is a reason for each and every story attached. In fact, place names are the history of which history books tell.

Consider, for example, Vancouver Island, where quite possibly you will be spending your holidays this summer. Put a map of the island before you and look at the names: Victoria, Sooke, Alberni, Duncan, Courtenay, Qualicum, Cameron Lake, Ladysmith, Nanaimo, Comox, Campbell River, Mt. Arrowsmith, Victoria Peak, Shawinigan Lake, Parksville, Cumberland. Just a cursory glance at such shows you that Indians, Englishmen, Scotchmen and Spaniards have at some time or other formed and lived in cities, villages, settlements or communities sufficiently important to have special names. These names being given by or on account of their inhabitants.

But they tell us more than that, each place having its own local history to which its name is generally the key, and of which it is also in many cases the descriptive. Take that Indian word "Esquimalt", the name of the municipality adjoining Victoria on the west. It means shallow, shabby beach, obviously just the kind of landing place the Indians coming in their dugout canoes would be looking for. So you are now from an Indian harbour before the British navy used it as a naval base.

On the other hand, the name Victoria has nothing whatsoever to do with the aborigines or Spaniards, being straight English. The city was founded as a fort by the Hudson's Bay Company, being first called Fort Alberni after Queen Victoria's royal consort, the name, however, being almost immediately changed to Victoria, in honour of the great queen then reigning, in 1852. Prior to the erection of the Hudson's Bay fort the Indians knew the present site of Victoria as Camosun.

Saanich, the name of the peninsula on which Victoria is built, denotes the land of an Indian tribe, the name, while the name Malahat, which should be Malakut, means plenty salt, referring to the waters at the foot of the famous Mountain drive. And just to the west of the Malahat Mountains lie Sooke and Shawinigan Lakes. Sooke is the name of an Indian tribe, and Shawinigan commemorating a great battle between two tribes, a battle fought with no quarter until, so the story goes, all the warriors were killed.

Moving north we come to the Cowichan Valley, the home of the powerful and warlike Cowichan tribe, incidentally one of the few tribes to take kindly to the white man's civilization. In the heart of the valley is the thriving country city of Duncan, named after John Duncan, one of the most of the most English cities on Vancouver Island, let alone in British Columbia. A very fine country town, Duncan, in the heart of a rich valley. These Scotch pioneers always chose well.

On the south edge of the Cowichan Valley is the coal town of Ladysmith. Write it in two separate words, Lady Smith, and the eye is immediately becomes aroused. A titled lady, yes, but a title tacked on to a very, perhaps one of the one of the most, plebeian names known. Who was the lady, the only person to have been a peeress in a place named on Vancouver Island? Possibly you will imagine she was some local celebrity who won rank and fame. The actual fact is quite different.

When arrangements were being made in 1900 to bring to the mines and found a city where Lady Smith now stands, the South African war was being fought, and the eyes of the world were turned to the scene of the world's most famous battle, the battle of Ladysmith, in which British troops were besieged by the Boers. On March 1st, 1900, the town was relieved by Colonel Lord Roberts. The cause of the immense excitement and the owners of the new townsite on Vancouver Island named their property Ladysmith in honor of the event.

So far so good. You now know that the whirling of history has caused two towns to be named after Lady Smith, but you still do not know who the lady was. Well, she was the wife of Queen Victoria's General Sir Harry Smith, Governor and Commander-in-Chief in Cape Colony, South Africa. It was as his wife that the town of Ladysmith in South Africa was named after her. She was a Spaniard, and I often think the haughty donna may have turned up her nose when they heard she was marrying a Smith, for her maiden name was Juana Maria de los Dolores de Leon, and she was a direct descendant of Ponce de Leon, famous in history as the Knight of Romance and conqueror after the Elisir of Youth.

Interesting Souvenirs

Dated June 1897 Recall Queen Victoria's Diamond Jubilee

Jubilee plans bring jubilee memories for G. E. Davis, of Swift Current, Sask.

A "New Testament" and a cup, given Mr. Davis by the school which he attended in Southborough, Kent, England, commemorate the Diamond Jubilee of Queen Victoria and are dated June 22, 1897. One of these articles bears a picture of the Queen with the inscription "V.R. 1837-1897 (Long Has She Reigned.)"

More Poultry Exported

Poultry exports in February amounted to 786,000 pounds valued at \$141,600, more than four times that of the same month last year when 141,036 pounds valued at 26,036 were exported, the Dominion bureau of statistics reported.

A historian wants to find the author of the first cowboy song. As justice in the old West was quick he doubtless lies in an unmarked grave.

Long On Philanthropy

English Clergyman With Independent Fortune Made Many Happy

Golden deed, "Five-minute Frank," the Rev. Frank Tatchell, 800-a-year vicar at Midhurst, Sussex, England, is the object of mourning throughout the district since the arrival of word of his death while on a health cruise in the Indian ocean.

Public spirited charity fortified by an independent fortune, made him one of the best known philanthropists.

He converted the old vicarage—a mansion too big for a priest with no family—into almshouses for old people at a rent of one penny a week. He recently gave away 100 pairs of new boots to tramps. He provided emergency brandy at all hours of the day and night in cases of illness. Anyone in need had only to ring a special bell at the vicarage . . . no one was ever turned away. In summer the vicarage garden was as open to parishioners as a public park. He once spent \$7,500 in giving a party of local teachers a continental holiday.

His nickname was earned by the fact that his sermons were never more than five minutes long.

FASHION FANCIES

PRINTED TAFFETA AFFORDS COLORFUL INTEREST TO THIS DARLING CREPE COSTUME

By Ellen Worth

Here's a delightfully chic little jacket dress for casual wear. It's navy blue shirred silk to be certain and its trim is navy and white taffeta. It's so fresh and young looking, you'll fairly want to wear it.

Note the tied scarf neckline of the dress. The jacket is nipped in at the line.

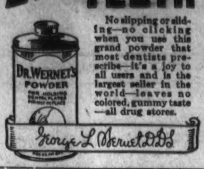

Perhaps you'd like it carried out in natural sportswear line, too. It's navy blue shirred silk to be certain and its trim is navy and white taffeta. It's so fresh and young looking, you'll fairly want to wear it. Note the tied scarf neckline of the dress. The jacket is nipped in at the line.

Pattern 20 each of the dress in nautical blue handkerchief linen. It's the sort of thing that adds dash to your summer wardrobe. Style No. 864 is designed for sizes 14, 16, 18 years, 36, 38 and 40 inches bust. Size 10 requires 2 1/2 yards of 54-inch material with 2 yards of 39-inch contrasting and 1 1/4 yards of 39-inch lining for jacket.

DR. WERNER'S POWER FOR HOLDING TIGHT

YOUR HANDWRITING REVEALS YOUR CHARACTER!

By LAWRENCE HIBBERT (Grapho-Analyst) (All Rights Reserved)

(Editor's Note: Letters come in every day testifying to the help that this well-known Handwriting Expert has been able to extend to others. Can he help you?)

Here are some more replies to correspondents. Readers may find some of them of interest. In some cases the letters deal with here.

Mrs. D. G.: Your writing reveals that you are somewhat disposed to enlarge apparent slights and to resent them. Yours is not a nature that easily forgives. And this is why you might start to develop a broader point of view. Do not be in too much of a hurry to impute "base" motives to others. Do not be quarrelsome, nor allow yourself to get too easily irritated. And, above all, do not carry a chip on your shoulder. There is no surer way to lose your popularity and your friends.

Mrs. M. G. A.: In regard to your singing—keep at it. It is no use getting downhearted and spasmodic about it. There is only one way to learn to sing. It is to sing. And this you can expect to get anywhere in this, and it is by keeping at it. You do not have to have perfect pitch, and it is a pity to ignore it, or not to try really earnestly to get the best from it, merely because of a few passing disappointments. Remember, Mr. Bruce and the spider!

Miss S. writes as follows: "I am 17 years of age, and in love with a man of 39. My parents do not approve of my having anything to do with him. He is a very nice man, and I think I should do it. What do you advise?"

I believe that you would be doing a very unwise thing to marry him. He is a man of 39, and you are only 17. He is a dominating nature, and is selfish and undoubtedly is very set in his ways. He is not all that generous or sympathetic type. Your own writing, on the other hand, shows that you are inclined to be variable and changeable. You are, in my opinion, more in love with love than with the man. In any case, you are too young to do anything serious in this matter at the present, and it will do you no harm to wait a while.

Would you like to have your handwriting analysed? And perhaps you would like to know what your character would look like to know? Mr. Hibbert can help you as he has analysed others. Send him your specimens of the handwriting you wish to be analysed, and enclose 10 cent cash for each. Send him the analysis and enclose with a 3c stamped addressed envelope to: Lawrence Hibbert, Winnipeg Newspaper Union, 175 McArthur Ave., Winnipeg, Man. Letters are confidential and replies will be forwarded as soon as possible.

Lion Almost Wrecks Ship

Roar Initiated Siren and Mixed Up Signals In Fog

The story of how a lion nearly wrecked two ships in the Baltic sea has reached Riga, Latvia.

The story of how a lion nearly wrecked two ships in the Baltic sea has reached Riga, Latvia. The lion was one which killed a trainer at a Helsinki circus. Its latest exploit occurred while it was being shipped from Helsinki, Finland, to Tallinn, Estonia.

During the voyage a thick fog came up and the ship started to sound its siren as a warning to other shipping.

The lion initiated each hoof with a tremendous roar, to the amusement of all on board. A few minutes later they did not think it so funny.

During one of the brief spells of silence they suddenly heard the warning signal of an approaching steamer, and captain of the ship containing the lion immediately sounded his siren twice, meaning "put the helm to port."

At this moment the lion gave a mighty roar. Thinking that it was a third blast, the skipper of the approaching steamer took the whole signal to mean "stop" and pulled up his vessel—right in the path of the other, which was invisible.

A collision was averted by inches.

Cycling Boom In England

Manufacturers Have Been Kept Busy Supplying Large Demand

Forced by the depression of a few years ago to give up their motor-cycles, many young men in Great Britain quickly discovered a new stimulus to health and escape from crowded cities in the form of the humble push-bike. Out of this necessitous movement the great cycling boom of to-day has grown. Now, it is authoritative computing, \$10,000,000 people are riding cycles and tandems along the roads and by-ways of Britain, reaping untold health and enjoyment.

To cope with an unprecedented demand for new machines, British manufacturers have been compelled to reconstruct, and in many cases, redouble the output of their plants. One firm which produced 22,000 cycles and tandems in 1931, 270,000 in 1932, and 410,000 in 1933, already turned out 700,000 new machines.

The total production of 1934 will, it is anticipated, reach the record figure of 1,500,000 machines, or 500,000 more than the previous year's total.

Both the Cyclists' Touring Club and National Cyclists Union have been inundated with new members in the last few months. The latter now enjoys a membership of 40,000 compared with 32,000 in 1933. In London alone are over 400 cycling clubs. Two recently established are for women only.

One Of World's Best

Young Englishman Commands Imperial Airways Enormous Passenger Liners

The 25-year-old with the best flying job in England is Captain James T. Percy, who has just been promoted to the command of the enormous Imperial Airways 40-passenger liners, and who is now qualified to take full control of the world's largest land aeroplanes on the world's longest air line.

Air-minded, air crazy, nine years ago Percy begged and borrowed rides from pilots until he won his private pilot's license. He joined Imperial Airways in the most junior of positions, engineer apprentice. After three years of greasing—and scraping, he collected enough money to buy a commercial pilot's license. He learned navigation and radio, flew cross channel routes and is now the youngest first rank pilot in Europe.

Recipes For This Week

(By Betty Barclay)

BEAN CORN MEAL MUFFINS

3 tablespoons shortening
3 cups sugar
1 egg (well beaten)
1 1/2 cups milk
1 cup all-bran
1/2 cup corn meal
1 1/2 cups flour
1 teaspoon salt
4 1/2 teaspoons baking powder. Add eggs, milk, bran and corn meal. Sift sugar with salt and baking powder and add to first mixture. Stir only until flour disappears. Bake in greased muffin tins in a moderate oven (375-400 degrees F.) for 20 to 25 minutes.

TROPICAL DELIGHT

4 ripe bananas
1/2 cup orange juice
4 tablespoons brown sugar
1 cup shredded coconut
Peel bananas and cut in half lengthwise. Arrange in layers in greased baking dish. Mix orange juice with brown sugar and pour over bananas. Sprinkle thickly with coconut. Bake in hot oven until bananas are tender and coconut is brown. Serve immediately. Serves 4.

Shipments Of Pitchblend

Twenty Tons To Be Flown Out Of

Twenty tons of pitchblend concentrate, worth \$200,000, are to be flown from Eldorado Mining Company claims on Great Bear lake to the railroad at Waterways before the spring break-up in mid-April. It is revealed by W. Leigh Brimble, Mackenzie Air Service president. The shipments form part of the \$2,000,000 worth of radium ore scheduled for movement this summer as the Eldorado company speeds production of radium to meet standing orders at the Atomic Energy Commission.

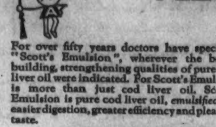

Movement of the first tons will require flights from Waterways to Great Bear lake one day and back the next for the speedy new Bellanca of the Mackenzie Air Service. Both trips in will move, two tons of ore.

X-Ray Revealed Too Much

Ralph J. Anderson, attorney, walked into a doctor's office at Kansas for a physical examination bearing \$15 in his billfold—a \$10 bill and a \$5 bill. The physician placed Anderson under the X-ray and finished. When the examination was finished, Anderson asked: "How much do I owe you?" "Fifteen dollars," the physician replied.

Columbia University physicist who measured size of a neutron have fixed it at 0.0000000000001 inch.

The Abundant Vitality of Cod Liver Oil PLUS PLEASANT TASTE

For over fifty years doctors have specified "Scott's Emulsion", wherever the good qualities of pure cod liver oil and vitamin D were indicated. For Scott's Emulsion is more than just cod liver oil. Scott's Emulsion is pure cod liver oil, emulsified for easier digestion, greater efficiency and pleasant taste.

THE COD LIVER OIL WITH THE PLUS VALUE

Little Journeys In Science

(By Gordon H. Guest, M.A.)

CELLULOSE makes up the chief part of the cell walls of plants. Cotton is about 85 per cent. cellulose, and the materials making up the remaining 15 per cent. can be easily removed with certain solvents, leaving the pure cellulose. Absorbent cotton is almost pure cellulose. Scientists have found that cellulose does not dissolve in any of the ordinary solvents, but it is converted into soluble compounds by the action of certain chemicals. Thus, it has been found that when cellulose is treated with lye, a compound is produced which is soluble in a liquid called carbon disulphide. This reaction is the basis of the production of most of the rayon in America.

Science has also changed this important plant product into many other useful substances. For example, when it is treated with concentrated sulphuric acid, it is changed into dextrine or grape sugar, which is used in large quantities in the production of candies, jellies, jams, syrups and other sweets. Sulphuric acid of the proper strength converts cellulose into parchment paper, while a cold 30 per cent. solution of lye produces mercerized cotton. When cellulose is treated with a mixture of nitric acid and sulphuric acid a compound known as nitrocellulose is produced. Nitrocellulose is a white inflammable solid which under certain conditions is highly explosive.

Nitrocellulose has many important commercial uses. It is the chief constituent of smokeless gunpowders. Photographic films are also made from it. It is the basis of all the lacquers that have been used so much in recent times, especially in the automobile industry. Imitation leather used for bookbinding, automobile cushions, hand bags, and trunks, a main road, and make a garden and playing field. Amid herbarious borders and rose trees a light and airy bungalow is erected in the form of a quadrangle. A verandah runs round the quadrangle of this bungalow school, on to which all the classrooms open.

Glazed partitions take the place of walls on the inner side of the quadrangle, and these can be removed, so that all the classrooms are fully open to the fresh air. Hendon has four of these semi-open-air schools and a fifth is to be built.

May Have Sand Beach

Up-To-Date Swimming Pool On Liner "Queen Mary"

Specimen sections of the proposed grand stairway in the Cunard-White Star liner Queen Mary, show that the walls of the stairway will be paneled with paintings by prominent artists.

Work has been started on the first class swimming pool, where Italians are directing the laying of a special kind of ornamental tiles.

There will be an artificial palm beach adjoining the first class pool, where the palms will be stirred lightly by soft breezes from hidden fans.

Margate corporation has offered to supply sand for the beach.

Explorers Enjoy Trips

Do Not Go To Polar Regions To Aid Science

The idea that explorers go to the polar regions to aid science is 100 per cent. bunk—or almost 100 per cent., according to Vilhelm Stefansson, and he ought to know.

Stefansson, famous explorer, has spent almost 100 full years in the frozen north polar regions. "They go back because they like it," Stefansson explained.

His high tribute to the explorations of Admiral Richard E. Byrd which have given the United States possession of virtually one-fourth of the Antarctic continent.

Less than 100 years ago, the passenger pigeon was the most prevalent bird in all North America. The last specimen died in the Cincinnati zoo on Sept. 1, 1914, and is now mounted in the Smithsonian institution.

Miser's Queer Habit

Stinted On Food But Lit Pipe With Found Notes

London, it seems, has harbored an old miser who lit his pipe with five-dollar notes.

Edwin Thomas Howes was found dead in humble lodgings in southeast London, with nearly \$300 in his trousers pockets. He had \$1,106 in postoffice savings.

At the inquest a relative testified that Howes regularly stinted himself on food and the ordinary comforts of life—but had the expensive habit of lighting his pipe with one-pound notes.

Why certain animals sleep through the winter is not completely understood; lack of sugar in the blood is one possible explanation.

"Has your son's college education been of any value?"

"Oh, yes; it cured his mother of bragging about him."

Three uncancelled Geneva stamps issued in 1843 brought \$7,000 at a recent auction in London.

"Boy! I can breathe now!"

"The Canyon Trail", Etc.

SYNOPSIS

"You've fallen over to a half-share in plenty of trouble," the lawyer told Gerald Keene. "The Broken Spur has been systematically looting the ranch, and old Joe Carr, your partner, is drinking himself into ruin."

Dad Kane, desert rat and luckless prospector till now returns to tell Dustin and Spike Gosard, who had grubstaked him, of his discovery of a rich gold mine, and shows samples of the ore.

Dustin unexpectedly comes along while Stone and Edith are riding fence, and seeing them, stops and talks to Edith. He mentions their dispute could be settled by marrying him, and Edith refuses his proposal with remarks that make Dustin furious. He insults Stone, who promptly throws him into a pool of water. Dustin learns that "Grand Kane" has been sent for, and also that Duro Stone has seen the Broken Spur men rustling Carr's cattle. He sets out with Dad Kane to learn the location of the gold discovery. Dad Kane shows Dustin the mine.

They go back to camp, and Dustin shoots Kane. He fixes the shooting on Peyotl Gregg, a drug addict, who, stung by the narcotic he had taken, did not know whether he was guilty or not. They bury Kane and then return to the Broken Spur ranch. Meanwhile at the Hour Glass, Carr, Crewe and Stone speculate as to the meaning of entries in the notebook belonging to Dad Kane that Stone had found. Stone thinks of a possible solution, and, accompanied by Edith Carr, rides out to Red Water to test out his theory, which proves correct, and they find the rich gold deposit mentioned in the prospector's notebook. As they return to the house, they meet Dustin leaving the house, who, purposely, but unsuccessfully tries to ride down Stone.

Sam Dustin, the day before Gerald Keene's arrival in Lacombe, community suggests to Peyotl Gregg that Keene or Kane was a relative of the old prospector, and was seeking information as to the old man's whereabouts. If Peyotl wanted to live, and prevent finding out about the murder, Gregg should keep Keene when he arrived.

(Now Go On With The Story)

CHAPTER XV.—Continued

Already elated by the drink he had had at the dinner and by the arrival of his young partner, Carr was ablaze. His face was flushed and his voice cheery as he headed for the bar. Behind him, Frank Crewe kept close. He hated nights like this and he waited only the first chance to get old Joe back to the Hour-glass. At a word Carr turned on him.

"Oh, shut up, Frank. I've not been in town for a year. This is my night to howl." Here Stone . . . He grabbed Duro by an elbow. "You and Keene are the boys for my money. You've come just in time, Keene. We'll go into closed session to-morrow and show the Broken Spur a thing or two. Come up, Keene, and take your liquor."

Peyotl's eyes focused on the slender figure that stood by old Joe's side. So that was the man who meant to hang him! His eyes lit redly! He licked his lips with a dry tongue and stared across the room. The door slammed open and Sam Dustin slouched to the bar. If his quick glance took in that back door, if he saw the dark figure of Peyotl huddled in the shadows, no one knew it.

"I reckon we can do better at the hotel, Mr. Carr," Peyotl said the newly arrived Gerald Keene touch the old ranch-man's arm and he caught the sharp reply.

"Better'n what? This liquor's good enough. I'm tired of talkin'. Seems like I've been talkin' all my life. You're all right, son. Any nephew of old Peter Vinton's bound to be all right. Not like these lousy Broken Spur heel-laps. They've been lootin' hair an' hide off the Hour-glass for five years now an' . . . He swept on in a mad speech.

There were Broken Spur men in that crowd and at a motion from Dustin they swept aside into a group, dark-faced and angry; ready to start a fight at a moment's notice. Peyotl sensed the tenseness. Suddenly Carr swung away from the door and with Gerald Keene at his elbow headed for the roulette table.

"G! me a stack of chips . . . Not white . . . Blues an' reds . . . Now watch! I'm playing Cripple Creek . . . One, three five, seven an' eight."

Twice he repeated his plays and each time the reluctant cashier thrust his winnings across the table. Suddenly the big electric light over the table flickered and died and a voice shrieked out:

"Somebody's cussin' his luck. A nigger passed the power-house. Keep your hands on your winnin's, you wait-eyd fools. . . ."

The big light blinked once and went out again in a blackness that tasted of smoke and dirt and sweat. "Somebody's cussin' his luck," said the voice. "Look to the fuse-box!"

Peyotl heard the front door slam. This was the one moment that might never come again. It was the opportunity he had hoped for!

He wriggled like an eel inside that door and headed straight for the roulette table where had seen Gerald Keene standing by the elbow of old Joe Carr. He knew that room as a horse knows his own stall and at six feet a man cannot miss even with a two-and-a-half-inch derringer.

The darkness hung like a curtain. Men moved about the table waiting for light but before that light could come there was a short, barking report, a curious metallic smack like a fire-cracker exploding in a can, but there were no sparks to break the darkness. Then suddenly the room was flooded with light and the blinded every eye and men blinked at each other dazed and staring.

"God God! Look there. . . . A man shrilled out in terror. Gerald Keene lay across the roulette table with blood running over the green cloth and his fingers convulsively clutching at the top of the door!"

"Shut the door!" shouted a voice from the rear. "A man's been shot. . . ."

That was no new thing in the Silver Dollar but the doors shut as if by magic. Stone thrust the milling crowd aside and was in turn forced back by Crewe.

"Let me have him. . . . Stone led the limp figure on the table. "For God's sake some one get a doctor. The man's been shot. . . ."

"Who is he? Where'd he come from? Who is he? A dozen voices shouted the questions as though the answers could make any difference. "It's Gerald Keene, half-owner of the Hour-glass," said Crewe. "He only got to town this evening! . . ."

"Keep that door shut till the Sheriff gets here," he said. "It's a matter for the law! I reckon. . . ."

"Hold everybody. . . . Big Jim Garvey, the Sheriff barged into the room, slammed the heavy front door and looked it. "This calls for a show-down," he said. "Who fired that shot?"

No one answered him. The light smoke filtered up through the lamp and the bartender hammered at the closed door. He had gone at once for Doctor Eppe, the "vet," the only doctor in the town who would be sober at that hour. Garvey opened the door and Eppe, the doctor, pitched into the room. Logan, the bartender thrust him toward the roulette table where the wounded man lay with his head on Stone's arm.

"How bad's he hurt, Doc?" Logan

retrieved from the bar his only spec for gun-shot wounds . . . a bottle of whisky and held it to the victim's lips while Eppe made a hasty examination.

"Just above the liver," he said finally. "Looks mighty bad to me." "Good God! D'you think he'll die?" demanded Crewe.

"Huh. We'll all die. Some'll go before the rest. That's all I can promise right now. Logan, let me have that bottle. . . . He was poking and prying in the clothing of the wounded man. "Here's what hurt him. . . . The bullet went clear through him. . . . and he held up to their gaze a stubby, soft-lead bullet. "It's a Derringer bullet," he said. "I'll bet there hasn't been one of these fired since the Civil War. The question is . . . Who fired it?"

Stone thrust forward impatiently. "Shut up," he said sharply. "For Heaven's sake get some action." That brought Garvey back to the present.

"Say your guns on the bar," he said. "Every man's under suspicion till this mess is shifted. Has anybody here since the shooting?"

"No. No. . . . A dozen men swore to it. "Not a soul has left." Stone laid his own gun on the bar and stared at Dustin who followed suit. Every man in the room trooped up to the bar and laid his gun on it to be carefully examined by Garvey.

"Some one in this outfit's got a Derringer cached," he said curtly. "No sense wastin' time over a lot of forty-fives when I know it was a forty-one hit him. 'You first, Dustin. . . ."

Dustin raised both hands and gripped his questioner's every inch of his person. Then he stepped aside and man after man was subjected to the closest examination. Each, as Garvey nodded, stepped back grinning.

"Nothin' doin'," he said sharply. "You can all of you go. . . . One by one they departed and Garvey examined every window in the room but all were closed. No pistol could have been thrown out after it had been fired.

"Dammed if I kin figger it out," muttered Garvey. "There's nobody here but the House and me. . . . sure they never shot one of their own crowd. However . . . I got to search you all," he said suddenly. "You first, Stone. . . ."

Carr, still a little dazed by the liquor he had drunk and by the rapidly occurring events, stood staring at Stone as the Sheriff and the Cripple Creek up to Garvey and were examined.

"You now, Joe. . . . (To Be Continued)

A Famous Scholar

Englishman Knew 28 Languages And Many Oriental Dialects Sir William Jones, an Englishman who lived in the eighteenth century, was one of the world's most famous scholars. He mastered 28 different languages, and had a working knowledge of many Oriental dialects. When Sir William was 33 years old he decided, in his own words, "to learn no more rudiments of any kind, but to perfect myself in, first, 12 languages, as the means of acquiring accurate knowledge of history, arts and sciences." These were Greek, Latin, Italian, French, Spanish, Portuguese, Hebrew, Arabic, Persian, Turkish, German and English.

Later, being sent to India, he extended his researches far beyond these seemingly ample limits. He was the first Englishman to completely master Sanskrit, and he attained a considerable knowledge of Hindustani and Bengali. He delved into the Indian dialects, such as the Thibetan, Pali, Phaluv, and the Deri. Among the languages which he acknowledged to have studied least, but of which he had far more than ordinary knowledge, were Dutch, Swedish, Chinese, Syriac, Welsh, Russian, Coptic, Runic and Ethiopic.

Registrations Are Up An increase in registrations, transfers, memberships and receipts for the first two months of the year is the cheerful report just released from the head offices of the Holstein-Friesian Association of Canada. The number of animals registered was 4,465 and the number of transfers issued, 2,729. Compared with the same period of 1934 this represents a gain of twenty per cent. in registrations and forty per cent. in transfers.

The new general manager was inspecting the branch office. "How long have you been working here?" he asked the office boy. "Ever since the day the boss threatened to sack me," replied the young man.

Ontario produced about four-tenths of the Canadian commercial strawberry crop in 1934; British Columbia, three-tenths; Quebec, two-tenths, and New Brunswick and Nova Scotia combined, one-tenth.

Japanese listeners. It is reported, turn their radio dials to programs daily broadcast from Shanghai, China. A total of 5,899 cattle and 18 calves were exported from Canada to the United States from February 7 to 21, 1935.

TO ALWAYS GET FAST PAIN RELIEF

An Aspirin tablet starts disintegrating as soon as it touches moisture. That means that Aspirin starts "taking hold" . . . cases even a bad headache, neuritis or rheumatic pain almost instantly. And Aspirin is safe. Doctors prescribe it. For Aspirin does not harm the heart.

Be sure to look for the name Bayer in the form of a cross on every Aspirin tablet. Aspirin is made in Canada and all druggists have it.

Demand and Get ASPIRIN

TRADEMARK REGISTERED IN CANADA

Superstitions Old And New

People Attribute Good Or Bad Fortune To Many Things

Old superstitions remain and new ones are added. When winners in the Irish Sweepstakes were asked to say what they attributed their good luck, says the New York Times, a heavy percentage replied that they had a "lucky number" to thank. (The number 13 was considered both lucky and unlucky.)

Others attributed their good fortune to spiders, "money spiders" particularly, and one individual believed he won because he had carried a piece of coal about with him since the dawn of 1933. One gave the credit to a fall of oak leaves upon him, and another wrote: "Last year was the first time that swallows built on my property, and my wife said immediately, 'Oh, don't disturb them, swallows bring good luck!'"

In England, superstition is not confined to the countryside; it is to be found even in the centre of business London. No member of the Rothschild family, for instance, will shake hands with a customer in his own bank or place of business. The Rothschilds consider it unlucky to do so.

Again, London's Rush House has eight of its pillars ornamented and one plain. The idea, derived from the ancient Greeks, is that God alone can achieve perfection and that man therefore should not attempt it.

Practically every member of the London Stock Exchange carries a macaw. One especially favored is a crooked coin, a sixpence for choice. But for the crooked coin to bring luck it must have been given to you. You must not have received it in change.

For the last seventy years, a well-known diamond merchant asserts, the fortunes of his firm have been influenced by a large and beautiful sapphire. This merchant is K. D. Parikh of Antwerp and Bombay, and the sapphire, which came from the Kashmir Mines, was bought by his grandfather forty years ago.

The gem is named "Shani," which means "Luck Bringer." It is kept in a special safe and is taken out only once a year, on New Year's Day. Once it was sold and immediately misfortune befell the firm. It was bought back, and all went well.

"Shani," which once cost \$10,000, has gained so remarkably a reputation that \$60,000 was offered for it not long ago.

Too Costly To Keep

London Firm Is Anxious To Sell Valuable Diamond

The Diamond Corporation of London is trying to sell the Yorker diamond, the second largest diamond in the world, which is valued at \$375,000. It was found in South Africa in 1933. The possession and care of the gem costs the corporation \$15,000 a year, so that if it remains on their hands for 25 years it will have cost them just as much as they will get by selling it now.

Cavemen of the past were no stronger or healthier than modern man, concludes a scientist who has surveyed the evidence. In the strait and narrow way you avoid traffic jams.

RELIEVE PERIODIC PAIN

If you suffer from menstrual pain and discomfort, try Lydia E. Pinkham's Tablets. In most cases they bring welcome relief. As Mrs. Caroline Newman says, "They ease the pain."

Mrs. Raymond Chapin, Box 4, Tibury, Ont. says, "I suffered something terrible. Had such backaches and headaches I was worn out. Your Tablets helped me. Let them help you, too. Ask your druggist."

Lydia E. Pinkham's TABLETS

Not To Be Envid

King George Has Heavy Job And Few Privileges

Bruce Baden writing in the Chicago Herald said Examiner says: "The most underpaid man in the world is the King of England. This may sound like a joke, but it is not."

Travel wherever you will in the world you run across British possessions. India, with its four hundred millions; the treaty ports of Shanghai, Hongkong, Singapore; Canada, Australia, Bermuda, New Zealand, great stretches of Africa—immense, diversified territories each with its own interests, hopes, jealousies, ambitions. All ruled by a group of islands so small you can hardly find them on the map.

What holds them all together? The British monarchy. When at the close of every public gathering in the Empire the band plays God Save the King and everybody stands bareheaded. The King is the symbol of the heterogeneous collection of lands and peoples from lying apart. The emotional tie of loyalty—the universal reverence and affection of the King.

Recently we have heard talk of the "over-privileged." It is necessary to define the term. You cannot measure privilege merely by title of wealth. Some rich men are over-privileged; some at whatever income, would still be underpaid.

The most underpaid of all is King George. He has few privileges. None of us would want to change places with him. His life is a dog's life—always on parade, forever signing papers and laying coronations. But he does the biggest job in the world, holding together the Empire on which the sun never sets."

Bequest Has Reservation

Housekeeper Receives Fortune On Condition She Never Marries

If Miss Hetty M. Raynham remains single and lives in the dwelling at Tarrant, England, where she has kept house for years, she will receive \$500,000. When she learned of the condition in the will of the late Henry W. Prosser, by whom she has been employed as housekeeper for many years, Miss Raynham told a friend: "I have been single for so many years that I don't think I shall worry about getting married now."

A friend of Miss Raynham reports that Miss Raynham intends to remain at the Prosser house. "She is known in the village as Miss Adams, and has been a constant companion for many years. She devoted her life to him and nursed him through the illness just before his death. She is aged about 50, and is extremely popular in the village." Prosser was an engineer.

Agnes, London's Rush House has eight of its pillars ornamented and one plain. The idea, derived from the ancient Greeks, is that God alone can achieve perfection and that man therefore should not attempt it.

THE RHYMING OPTIMIST

By Aline Michaels

THE HEARTY YOU LOVE

O, never hurt the heart you love
Least some time, greater grown,
The scar you set upon that heart,
Be found within your own!

For it is thus that time brings back
The heart that is dead;
It leaves a stamp upon your life,
Though none may know save you.

O, never let the heart you love
Be shadowed by a doubt
Which on your own may fall some
To drive the sunlight out.

O, never hurt the heart you love;
Who knows how very far
The scar you may penetrate at last
Or who may bear the scar?

Remarkable Find

Ancient Seal Found In Palestine May Throw New Light On Biblical History

One of the most dramatic episodes in Biblical history was believed thrown open for new study as the result of the recent discovery at ancient Lachish of a seal from the reign of Gedaliah, last of the kings of Judah, who was murdered by a pretender to the throne, it was revealed to the Paltor Agency by a member of the archaeological expedition.

Characterized by members of the expedition as one of the most remarkable finds of its nature, the ancient seal has inscribed upon it in Hebrew: "To Gedaliah, who rules the house." It is presumed the seal belonged to Gedaliah Ben Ahikem who ruled the remnant of the Kingdom of Judah after Nebuchadnezzar, king of Babylon, destroyed Jerusalem.

One of the revengeful pretenders to the throne caused the assassination of Gedaliah, which is described in second Kings, chapter 25, verse 25.

Lifboats were launched on 340 occasions in the United Kingdom during 1934; 354 lives were saved, and help was given to 54 vessels.

Mexico leads all Latin-American countries in the area of vast land estates. Orange juice, eggs and cheese are delivered by New York milkmen. In Detroit they deliver tomato juice.

Little Helps For This Week

The Lord heareth your murmurings which ye murmur against Him. Exodus 16:8.

Without murmur, uncomplaining. In His hand, Leave whatever things thou canst. Not understand.

One great characteristic of holiness is never to be exacting—never to complain. Each complaint drags us down a degree in our upward course. If you would discern in whom the spirit of God dwells, watch that person, and notice whether you ever hear him complain.

When we wish things to be otherwise than they are we lose sight of the great practical parts of the life of godliness. We wish and wish when, if we had done all that lies on us, we should fall quietly into the hands of God. Such wishing cuts the very sinew of our privileges and consolations. You are leaving me for a time; and you say you wish you could leave me better, or leave me with some assistance; but if it is right for you to go it is right for me to meet what lies before me without a wish that I had less to meet, or were better able to meet it.

Times Work By Candles

When Two Burn Out English Flint-Knapper Goes Home

There is one man in England who still times his work by candles. He is George Ashby, who burrows deep in the earth at Brandon in Suffolk, searching for the flints which his mate Herbert Field chips to fit the old flintlock guns still used in primitive places. They are two of the last flint-knappers, and old Mr. Ashby is surely the only man in England who prefers a candle to a watch as a timekeeper.

Though he is seventy-one he still makes his way each morning down a shaft fifty feet deep, looking for flints as did Stone Age men in pits close by when they wanted to renew their arrowheads and axes. Besides his lunch he takes with him two candles, and when these are burned through he climbs up out of the pit and goes home. They tell him when his day's work is done.

Housing Plan

Housing Scheme In Winnipeg Most Successful

The 1920 housing scheme had been "most successful" in Winnipeg; Alexander Officer, chief inspector of the division of sanitation and housing, told the parliamentary committee on housing at Ottawa. The house had been built at an average cost of \$4,000 for "white-collar men," who liquidated their obligation in the form of rent over a period of years, he said. The city housing commission had met all its obligations and continued to have money in hand.

Mr. Officer emphasized his own particular concern was public health. In Winnipeg, out of 46,810 houses, there were only 247 without sewer and water connections. He doubted if there was another city in Canada with the same record.

Depicting Scenes From Past

Over 2,000 Actor Taking Part In Pageant At London

For the Tower pageant and fifteen on Tower Hill in London for tattoo on Monday, May 25 to June 8, in celebration of the King's silver jubilee, a vast open-air theatre, seating 11,000 people, is to be built. The most, or ditch, as old mays call it, will be the stage, and the gray walls of the outer fortifications will be the "backcloth."

More than 2,000 actors will appear in brave scenes from the past. But because the history of the Tower is, in the main, a series of tragedy, Major Gould Walker, author of the pageant, has gone beyond the ancient walls and is depicting a history of England seen through the eyes of the city of London from the time of Stephen to the present day.

A new solderless connector for electrical work eliminates the use of blowtorch and soldering iron, and assures a perfect connection.

In the past ten years almost a million people in the United States—944,174, to be exact—have lost their lives from accidents.

Makes Generous Offer

Saskatchewan Postmaster Will Aid Jubilee Cancer Fund The King George V. silver jubilee cancer fund management has received from a Saskatchewan village postmaster an offer to donate to the fund all the profits from his private business between now and the end of the campaign, May 6.

The postmaster wrote he operated a newspaper agency in addition to his post office and was prepared to surrender all profits from that business. The management noted in a press communique that contributions from individual clergymen "constitute the largest number from any one group."

GAGGING THE NEWSPAPERS

(Edmonton Bulletin)

Gag the newspapers first, then call the election. That is the political strategy of the Reid Government, as embodied in the muzzling bills introduced through the legislature in its dying hours.

Neither the bills, nor the idea behind them originated with the ministry as at present constituted. Both the measures and the considerations out of which they grew are a part of the heritages handed down from the cabinet which was put through a process of enforced reconstruction last summer.

An attempt was made to run these bills through the legislature in the closing days of the session a year ago, but they were dropped, perhaps in feeling that they would instantly associate themselves in the public mind with some recent unsavory proceedings in which cabinet ministers had been involved.

The bills abandoned, the election was postponed. Now that the election can be no longer delayed, the bills are brought in again, and given the status and force of provincial statutes.

So, for the time—a time sufficient for the holding of the election—the code of publicly law and libel law

which has stood the test for twenty-five years has expended, and the newspaper reading public of Alberta are denied the right to information which is not denied to the residents of other provinces or of other parts of the British Empire.

Incidentally, the women employees of the Government of Alberta, and the women of this province generally are deprived of a measure of protection which is accorded to the employees of every other Government and the women residents of every other province in Canada. It is not suggested that the latter consideration is a motive for the enactment of legislation. The purpose is political; but the incidental weakening of the safeguards of womanhood is inevitable.

It is still true, as Mr. Bennett once said, that "We are making precedents in Alberta." And in the making of precedents, as in some other matters, we go from bad to worse. For the first time in the history of the province a Government

has made statutory declaration that it is afraid to face the electorate without checking the newspapers through which the electorate obtain their information about public men and affairs.

FOOTBALL SOCIAL DANCE

For a full evening of enjoyment, don't miss the Big Social and Dance (Friday) night in the I.O.O.F. Hall, Lacombe. Music for the dance will be supplied by Bob Paulsen and his band. Dance commences at 9 p.m. Admission to dance 35c. Lunch optional, 25c. This is your opportunity to have a great time and help the Football club while doing so. A quilt will be drawn for during the evening.

More 12 ft. Linoleum will arrive this week and our rug patterns are cheap as mail order houses. Lacombe Furniture Store.

Beauties With Their Beasts

Just another beauty and the beast picture, but the beasts are overshadowed by the beauties in this display of feminine and pachydermic pulchritude. The girls hail from three nations: Canada, the United States and Great Britain, and the handsome elephants were acquired by them during a visit to Ceylon. They are bringing them home in their baggage—pardon us, trucks, but that won't be until their world-cruise in the Canadian Pacific liner Empress of Britain is over in May. The picture was made on the boat-deck of the Empress of Britain at Colombo.

SOCIAL CREDIT

The regular meeting of Lacombe Group No. 1, will be held in the Town Hall on April 29th. Delegates' report and other business items of interest to be discussed. Everybody welcome.

The Women's Study Group was held at Mrs. J. W. Valens' home on Thursday, April 18th, and a very pleasant time was enjoyed by the entire group. The next meeting will be held at Mrs. D. D. Smith's home on Thursday afternoon, May 18th.

Mr. and Mrs. A. M. Campbell are holidaying at Vancouver and other Coast points.

The new Texaco Service Station on Nanton Street, operated by Bob Furks, is now being stuccoed. When completed it will certainly add to the appearance of the street.

Laban Sandbrook of Aspen Beach was in town this week and says he is opening a fully modern cafe at his place at the beach this year.

The postponed meeting of the Canadian Congress of Labor will be held in Town Hall, Wednesday, May 1st.

These truly better bran flakes have enough extra bran to be mildly laxative. Always fresh and ready to eat with milk or cream. Sold by all grocers. Made by Kellogg in London, Ont.

FROM A STAFF OF SEVEN TO SIX THOUSAND STRONG

From less than a corporal's guard to the equivalent of six regiments—this graphically illustrates the growth of the Bank of Montreal's staff in 117 years.

On the 23rd of August, 1817, the first four employees of the Bank of Montreal were appointed. They were the cashier, an accountant, a paying teller and a second teller. Shortly afterward a discount clerk, a second bookkeeper and a porter were added.

These seven constituted the original staff when the modest establishment on St. Paul Street in Montreal

opened its doors on Monday, November 3rd—an establishment which was destined to play a conspicuous and beneficial part in the development of Canada's resources.

Throughout the many decades that have followed, the Bank of Montreal has made increasing effort to provide a banking service always adequate to meet the requirements of Canada's development.

The original staff of seven has grown to 6,300, loyally serving the public through 500 branches extending from sea to sea—and overseas.

F.E. McLeod

Boy's Warrendale Shirts \$1.00 and \$1.25

Good looking, mannish style shirts. Stripes and small patterns. Dressy and roomy cut shirts for boys and young men. Collars attached. Sizes 12 1/2 to 14 1/2.

Easter Ties \$1.00

Stripes are popular and there is also a good choice of small figured designs.

Gloves For Easter—Smart Capeskin
\$1.25 and \$1.75

Tailored Slipons are worn everywhere. Neat and good looking, in smooth, serviceable leather. Colors: Fawn, Grey, Brown and Black.

Silk Crepe Hose—Kayser and Orient \$1.00

The high lights of fine Silk hose; service and delightfully delicate in these fine Crepe hose. Mir-O-Clear and ringless. The new Easter shades.

Table Linen For Easter

\$1.75, \$3.75 to \$17.50

Direct from the mills in Ireland. Beautifully finished, pure bleached table cloths and napkins. Sizes 54x54 to 81x108 inches.

Grocery Department

Oranges, Fancy Navela, dozen 35c. and 50c.
Grape Fruit, large, fancy quality, each 10c.
Lettuce, crisp, hard heads, each 10c.
Cocoa, Fry's in 1 lb. Celophane bags 19c.
Biscuits, chocolate coated short cake, lb. 25c.
Tomatoes, ripe, lb. 25c.
VEGETABLES, Lethbridge potatoes; Turnips, Parsnips and Carrots.

A TEA FOR EVERY TASTE

'SALADA' TEA

A Welcome Declaration Of War

The people of Canada, under the leadership of Their Excellencies the Governor-General and Lady Beesborough, supported by the Dominion and Provincial Governments, all political parties, the churches, the press, the medical profession, organizations of every description, and men and women of goodwill throughout the length and breadth of the Dominion, have decided to commemorate the twenty-fifth anniversary of the accession of King George V, to the throne of the world's greatest empire on May 6 by a declaration of war.

Canadians are a peace loving people; they abhor war, and their whole history proves that they never engage in war except when absolutely forced to in self-defence, but, once in, they fight to the finish with all the strength, energy and resources they can command. Fighting in their own defence they never remain on the defensive but adopt vigorous offensive tactics to bring about the defeat of the common enemy and safeguard their own existence. History proves this to be true.

So, with the lives of thousands of their people at stake, all Canada has decided to mark the Silver Jubilee of His Majesty, who has been well described as a kindly man and a manly king, by a declaration of war upon a common world enemy—cancer. The ammunition required to prosecute this war is—money. Money is necessary in the conduct of all wars, and in 1914-1919 Canada supplied it in the hundreds of millions, yes, billions. In this new and humanitarian war a substantial war chest is essential to success, although not in the enormous sums referred to above. Every Canadian family is asked to contribute to the extent of their ability.

Mankind is forced to wage a continuing war against disease, and looking back over past years it is gratifying to know that, taken as a whole, it has been a successful war. A few years ago the great scourge was Tuberculosis, the White Man's Plague, which topped the list of diseases afflicting the race. To-day it is in retreat, now far down in the list, with a steadily diminishing number of victims.

Yellow fever, which once counted its victims by the thousands, is unknown; smallpox has been eradicated; diphtheria, which carried off children by the thousands, has been conquered through the discovery and use of anti-diphtheria serum; cholera, typhus, and other plagues are now practically unknown, with the result that the expectation of life has been more than doubled, nearly trebled, within the past 100 years.

On the other hand, the ravages of cancer continue to increase until to-day it is responsible for more deaths than any other disease with the single exception of diseases of the heart. Cancer comes second on the list and in 1933 was responsible for 10,646 deaths in Canada as compared with 7,014 only seven years previously in 1926, and the toll is progressively rising higher each year, having increased from 93.9 per 100,000 in 1913-32 to 100 per 100,000 in 1933.

This is the common enemy that now calls Canada to arms and has resulted in this Silver Jubilee declaration of war.

Contrary to a view widely held, cancer is not an incurable disease. It can be cured if it is discovered and treatment commenced in its early stages. Early diagnosis is the all-important factor. But to secure early diagnosis involves, first, education of the public, the provision of a largely increased number of qualified diagnosticians, and facilities for treatment throughout the whole country. These are the essential munitions in this war, and they cost money.

The people of Canada, the rich, the merely well-to-do, even the poor, are called upon to enlist in the army of attack on his dread enemy which is now on the offensive against our people and scoring a victory over us. As a Canadian people we must now take the offensive, take it boldly and in a large way, and fight back. If we do, success can and will be achieved.

The idea of the "King George V. Silver Jubilee Cancer Fund for Canada" is an admirable one. It will be administered by trustees and every dollar will be spent in Canada, in the saving of Canadian lives. To establish that fund each Canadian family and household is asked to contribute one dollar, or as many more dollars as they can. Contributions may be sent to Lady Beesborough, Government House, Ottawa, who will acknowledge every donation received, large or small, on a card bearing the portraits of the King and Queen.

Thus does Canada propose to commemorate the Silver Jubilee of His Majesty by the creation of a permanent national anti-cancer fund. It will be an expression of the loyalty and affection of the Canadian people to His Majesty and at the same time a tangible, lasting and humanitarian record of a great national event.

We are glad to add the support of this column to the nation-wide appeal now being made in support of this effort to commemorate a reign that is one of the finest in British history in a manner which has received the gracious approval of His Majesty and as something designed to be of lasting value to suffering humanity.

The Right Of Way

According to the new traffic regulations in England the pedestrian has the right of way and motorists are not entitled to make anybody "pull back" at a crossing, the Marylebone magistrate, Ivan Snell, said in fining a woman motorist \$2.50.

A police judge says women now do 70 per cent. of the driving. But men still hold the steering wheel.

No Indication Of Quality

Canned peas have the size of the can stated on the label of the can. No. 1 is a very small pea; No. 2 is larger; No. 3 still larger, and so on. The size of peas is no way depends on the quality nor the quality on the size.

Isinglass comes from the swimming bladder of the cod and sturgeon.

Building Traffic Subways

Paris, France, is to be the first to build a subway, pushing the construction of a road built in place of the former fortifications surrounding Paris. This road, complete, will be nearly 30 miles long, 123 feet wide, and will permit the passage of six rows of cars. Side-walks on each side of the road are over three feet wide. Where this circular route meets the main arteries leading out of Paris it has been attempted, wherever possible, to direct traffic around a central plateau which serves as an axis. This eliminates to a certain extent the danger resulting from the crowding of cars from various directions and helps to reduce traffic tie-ups.

Arcades For London Streets

Expert Predicts City's Shopping Centres Will Be Covered
Women will soon be able to do all their window-gazing under cover in London, according to a merchandising expert, who says that the shopping centres will be a series of arcades. Mannequins will emerge from the shelter of the stores, where they already are continuously on display, and appear in windows in place of the present window figures, which have gone from the realistic to the fantastic and back again.

WAS CONSTIPATED FOR 30 YEARS

Woman's Long Search For A Remedy

The trouble with most remedies for constipation, as this woman found, is that they give only temporary relief. Having at last found a permanent corrective, she writes to tell us about it.

"For upwards of 30 years I was a victim of acute constipation. I tried practically everything that it was possible to try, I admit. I tried a chronic case, and every new remedy I tried helped for a day or two—after that I was just as bad as ever. Three months ago I took my first taste of Kruschen Salts, and every morning since, and every morning so long as I live, my first duty upon rising is to take Kruschen. I honestly feel a different woman. My bowels act to the clock, and my friends remark how well I am looking. My only regret is that I didn't try Kruschen years ago."

(Mrs. A. M. Kruschen Salts is Nature's recipe for maintaining a condition of internal cleanliness. The six salts in Kruschen's Salts act on the internal organs to smooth, regular action. Your system is thus kept clear of those impurities which, if allowed to accumulate, lower the whole tone of the system.)

Installs New Equipment

Montreal Institute Of Leading Cancer Cure Hospitals
The Radium Institute of Montreal became one of the leading cancer treatment hospitals in the world with installation of apparatus generating 500,000 volts. The institute hopes to raise the voltage to 1,200,000 in a short while. Dr. J. E. Gendreau, director, announced.

"Ultra penetrating X-rays at a voltage of 500,000 were put in operation only after extremely careful physical measurements preparatory to cancer treatments, and the apparatus has been used for the first time on patients," Dr. Gendreau said.

"This apparatus is the largest and most powerful in Canada and is surpassed by but a few in the United States or Europe," he said. He stressed the necessity of the many institutes in different countries to fight cancer with great success.

Makes Sure Of Celebration

Tenants Of Prince Of Wales To Receive Omelette
The farmers who are the Prince of Wales' tenants in his dual capacity in Cornwall will receive this—the jubilee year—as gifts 10 per cent. of their spring rents. One thousand estate employees will be paid an extra week's wages.

The heir to the throne of the Empire is making royally certain that there will be real jubilee rejoicing in the west country.—Toronto Globe.

Object To Uniform

Typists of Turkey are angry over the threatened rule of the Turkish government that they must wear a standardized uniform. A bill introduced in the Ankara parliament declares that the girls have dressed too frivolously, and they should wear a dark and simple costume. The typists declare such a rule would prevent them from developing their individuality.

Best She Could Do

A rather stout woman was making herself a nuisance in the big shop which was holding its annual sale. Nothing, it seemed, would suit her, and the unfortunate shop-assistant was beginning to get a little weary. "Haven't you anything ready-made that will fit me?" asked the customer at last.

"Yes; the umbrellas and the handkerchiefs are downstairs, madam," the girl replied.

Favors Alaska Highway

British Columbia Willing To Co-operate Says Premier
British Columbia is willing to facilitate construction of the Alaska-British Columbia highway, Premier T. D. Pattullo announced.

The subject has been brought very much to life by three recent events: 1. Passage by U.S. Senate of a bill appropriating \$2,000,000 for construction of the Alaska section and authorizing President Roosevelt to negotiate with the Dominion government for the section through Canada. 2. Semi-official press dispatches that the president is backing this bill. 3. Filing of a resolution by Clive Plante in the B.C. legislature calling for a return of the Panhandle to Canada as a condition of the highway construction.

Asked about these events, the premier said: "It is quite apparent that the United States wants a road connection with Alaska. In that connection we are ready to facilitate matters and have so indicated to the congressional delegate for Alaska."

Forests Are Vanishing

Advocate Of Chemical Research
Gives Warning To B.C.
Establishment of a forest chemistry research department to study possibilities of greater economic use of British Columbia forest products and by-products was recommended to the forestry committee of the legislature by Capt. M. H. Paulk, former German forest administrator.

Millions of dollars in excess of what is now being taken out may be secured from British Columbia's forests by a more intensive policy of development, Capt. Paulk asserted. At present the treasury gets annually only one and one-half cents revenue per acre for the total forest area. European countries the government gets as high as \$5 to \$11 per acre in revenue annually.

Unless something is done immediately B.C.'s wonderful forests will vanish inside of 18 years, Dr. Paulk declared. In the last 75 years the forest area had decreased from 135,000,000 acres to 9,000,000 acres, due to logging, disease and fires.

Civilization Too Crowded

Daughter Of Alaskan Hunter Prefers Wide Open Spaces
Elizabeth Madson, 18, daughter of Charles Madson, Alaskan hunter and guide, doesn't think much of so-called civilization. The girl, who accompanied her father to St. Louis on a business trip, had never seen a railroad or a city larger than the frontier town of Kodiak, Alaska, until last month.

"I feel as if I am in a prison in these large cities," she said. "Everywhere I go I have to watch my step to see that I don't bump into somebody or get run over by an automobile."

At home, Elizabeth spends her time trapping weasels. Her father, manager of the Kodiak Guides' Association, and his 20 assistants conduct visiting sportsmen in quests for moose, caribou and the great Kodiak bear.

Capitalized Disability

Alvina Bennett, 15, of Sharon, Pennsylvania, didn't despair when she lost both legs in an accident. Determined, she learned to walk and dance on her hands. To-day, because of her ability to walk upstairs on her hands, she holds a \$25 a week contract with Ringling Bros. circus. Accompanied by her mother, Myrtle Bennett, who also will be paid, Alvina will join the circus this spring.

Pedigree Certificates

The total number of pedigree certificates registered by the Canadian National Livestock Records, approved by the Dominion Minister of Agriculture, for the month of February 1935 was 9,916, as against 6,489 for February 1934. Horses numbered 228; cattle, 2,111; sheep, 481; swine, 450; dogs, 529; foxes, 2,926; poultry 190, and one goat.

It was a great Roman who said two thousand years ago, and it is still true, that those who take friendship from life blot out the Sun from the world.

London's new postoffice, Mount Pleasant, is the largest in Great Britain and the most highly mechanized.

'Growing' A Sea Wall

Rice Grass Effective In Preventing Flooding Of Land
The cultivation of rice grass on the low-lying lands of Essex and other similar mud flats in England may result in turning thousands of acres of waste land into profitable pasture.

Spartina, grass, became known in Great Britain about 100 years ago through a few seeds dropping accidentally from some cargo ships at Southampton Docks. They took root and formed a hybrid with British grass which attracted the attention of agricultural scientists who saw the possibility of "growing" their sea wall instead of spending thousands of pounds on sea defence to prevent the land being flooded. Experiments have proved that such a wall is not worn away by the tide, and now Holland and Australia are planting rice grass with a view to converting large tracts of marshes into pastures.

Bonns Paid On Coal

Canada Has Paid Out Over Six Million Dollars Since 1928
Since 1928 Canada has paid \$6,781,176 in subventions and other forms of assistance to aid the coal industry in the Maritime provinces and Alberta, a return tabled in the House of Commons said. Of that amount \$4,457,992 went to the Maritimes and \$1,809,958 to Alberta.

Payments made generally by the trade and commerce department to assist in placing Canadian coal used in the manufacture of iron or steel on a basis of equality with imported coal amounted to \$465,273, while "additional payments" made under the Domestic Fuel Act to the Maritime coal industry totalled \$87,955.

From 1931 to the present the amount of bonus paid on wheat was \$12,708,576. The outlay in the year 1931-32 when the five-cents-a-bushel bonus was in effect was \$10,908,428.

Retains Title For Life

Dr. Doughty Will Be Known As "Dominion Archivist Emeritus"
Dr. A. G. Doughty, who has retired after many years' service as Dominion archivist, will officially hold the title for life of "Dominion Archivist Emeritus" and will be provided with an office in the public archives of Canada.

An order-in-council pays tribute to Dr. Doughty's long and distinguished service and makes provision for his future. Retiring at the age of 75, after 30 years and 10 months' service, Dr. Doughty will receive an allowance of \$5,000 yearly and in addition will continue to draw the salary of a senior commission of Canada at a salary of \$3,000 yearly.

Poetry Competition Awards

Five Out Of The Seven Prizes Went To Toronto
Toronto poets won five of the seven prizes of the 1933 poetry competition of the Canadian Authors' Association, Montreal branch. It was announced at a meeting there.

Honorable mention was given Ridley Fullard, High River, Alta.; Mrs. H. G. Alexander, Vegreville, Alta.; Haroldine Copp, Vancouver; Agnes I. Aston Hill, Calgary; D. E. G. Carmichael, Calgary; F. W. Johnson, Calgary; Anne Marriott, Victoria; Commanded were: Essie M. Barker, Regina Sask.; Agnes I. Aston Hill, Calgary.

Irene Chapman Benson, of Winnipeg, won the \$5 prize given by Mrs. R. E. MacDougall for the best lyric.

Should Be Lucky

Schoolmaster In England Has Collection Of Unusual Horseshoes
An ardent collector of horseshoes. But not ordinary horseshoes. He specializes in ancient horseshoes. The walls of one of his rooms are covered with scores of them. They are overflow to other rooms. One of his horseshoes was discovered on the site of a Roman camp. In all probability it was cast from the foot of a charger ridden by a Roman general.

The world has about six million square miles of ice to-day, most of it in Antarctica, but when the last ice age was at its height there was about twice as great an area of the world ice-blanketed.

A Scientific Dictionary

Woman Has Completed First Book Of Its Kind
A scientific dictionary containing over 15,000 geological terms, the first extensive work of its kind, has been assembled by Miss Mabel Rice, secretary of the Princeton, New Jersey, department of geology for 15 years.

Her career as a lexicographer began in 1920 when, as assistant to Prof. Van Ingen, then a member of the Princeton faculty, she began to jot down unfamiliar terms at the rate of about 1,000 a year.

To her question, "Is there any kind of a geologic dictionary?" the professor had answered: "There ain't no such animal," so Miss Rice began her monumental work which is now considered one of the most important pieces of scientific apparatus in Guyot Hall headquarters of the department.

Several jawbreakers threatened to defy translation, one of the worst offenders being the word "caliche" (an obsolete term for the Potomac series), which had the best professors guessing for five years.

Miss Rice is not the only Princetonian in the field of scientific terminology, for the late Howard C. Warren '30, former chairman of the Princeton psychology department, spent the better part of his life compiling a dictionary of psychological terms.

Recently completed the first edition of this dictionary will soon leave the presses.

Hard To Determine

Fragment Of Metal Coffin May Be That Of Attilla
What is believed to be the grave of Attilla, King of the Huns, has been found near Turcasny, Sv. Martin, in Slovakia. Near the traditional site, a hillock standing out prominently in the middle of a very level area has been excavated, and fragments of what appears to be a metal coffin have been found. Metallurgists declare them to be of a peculiar copper alloy that probably dates from Attilla's time. Attilla is said to have ordered three coffins, exactly alike, to be made and buried separately, with a body in each, after his death, so that nobody would ever be sure where his grave really was.

School Named After Prince
The Prince of Wales has consented to his name being given to a school for underprivileged boys established in British Columbia along lines identical with similar schools set up in Australia for some years past. The institution in British Columbia will be known as the "Prince of Wales Fairbridge Farm School."

The catcombs of Rome contain a total of 6,000,000 tombs. In places they are seven levels deep and cover a distance of 500 miles in area.

The discovery was made at Tel Ad-Dunweir, ancient city of Lachish. It consists of 12 Otataraka fragments, which are taken to be an exchange of secret letters between the kingdom of Judea and the kingdom of Babylon or Egypt.

Details of the findings were made known to the Palestine government, but were not given out to the press.

English Town Thrifty
The changing times have not changed the Yorkshireman's thrift. When the people of East Winton in North Yorkshire met to arrange their jubilee celebrations they found the village still had a balance left over from the coronation of Their Majesties 25 years ago. So East Winton will use it to celebrate their jubilee.

Good Source Of Revenue

Over Million Dollars Yearly Collected From Tax On Cosmetics
Revenue from taxation changes in the 1933 budget for the period March 22, 1933, to last February 28 on a variety of states were disclosed by Secretary of State C. H. Cahan in reply to J. F. Pouliat (Lib., Temiscouata).

Information given was: Special excise tax of 10 per cent. on cosmetics and toilet preparations—\$1,561,928.

Special excise tax of five cents per 100 leaves of cigarette papers and special excise tax of five cents per 50 cigarette tubes—\$1,558,526.

Special excise tax of 25 cents per gallon of unfurfemented wort—\$303,346.

Recalls Days Of Slavery

Sales Took Place In Nova Scotia Over Century Ago
A negro named Minter was worth \$100 in 1779. A time-worn bill of sale disclosing evidence of slave-selling in Nova Scotia in the early days has been forwarded to Prof. D. C. Harvey, provincial archivist at Halifax by Miss Marjorie Palmer, Windsor Forks, great-granddaughter of the purchaser, John Palmer, of Windsor.

The document states on August 24, 1779, Joseph Northup, of Falmouth, "bargained and sold unto John Palmer of Windsor a negro man named Minter in consideration of the sum of one hundred pounds."

Correspondence Of Kings

Findings In Palestine Date Back To 700 B.C.
The correspondence between two kings dating back to the time of Jeremiah, 700 B.C., has been discovered by the archaeological expedition led by Prof. J. L. Starkey, of Great Britain. The discovery was made at Tel Ad-Dunweir, ancient city of Lachish. It consists of 12 Otataraka fragments, which are taken to be an exchange of secret letters between the kingdom of Judea and the kingdom of Babylon or Egypt.

Details of the findings were made known to the Palestine government, but were not given out to the press.

English Town Thrifty

The changing times have not changed the Yorkshireman's thrift. When the people of East Winton in North Yorkshire met to arrange their jubilee celebrations they found the village still had a balance left over from the coronation of Their Majesties 25 years ago. So East Winton will use it to celebrate their jubilee.

Warehouses At Calgary, Edmonton, Regina and Winnipeg

Man's Battle Against Insects Goes On As Fifteen Thousand New Kinds Are Found Yearly

Unknown to the world in general, a war—a great world war—is being waged every year—being waged by man for his very existence against insects.

Fifteen thousand new kinds of insects are found every year, and to combat this menace man is collecting the friendly ones to his aid.

A world with insects as the rulers and man as the insect has sometimes been visualized by writers of "scientific romances," and although this may appear fantastic and imaginary to the layman, it is not. Insects were allowed to multiply unchecked man would soon become overwhelmed by them.

Some cold facts about insects have been revealed by Dr. S. A. Neave, of the Imperial Institute of Entomology, London.

"Man's battle against insects can never cease," Dr. Neave said. "That is why we have so many different names, universally accepted, so that scientists can tell each other their discoveries and the best way of combating harmful pests."

"For much of the battle is waged by pitting useful insects against the harmful ones."

"In zoology, specimens are given two names. One is the general name, and the other is the name of the species."

"The generic name is given to a group of species whose close resemblance to one another shows them to be related. Thus mouse and rat, though they are different species, are known by the generic name of mus."

"For people realize the enormous part played in zoology by insects. Every year 1,000 new insects genera are discovered, and as many as 15,000 new specimens."

"It has even been calculated that if the total weight of the insects in Africa could be balanced against the total weight of the animals, the weight of the insects would be the greater."

"Insects are constantly adapting themselves to new conditions. There is a kind of fly found in oil wells which, generation after generation, is adapting itself to live without harmful effects in oil and prey on other insects that fall into it."

"And there is another kind of insect which spends its entire existence from birth to death in pepper."

A book that has been written on the generic name of every beast, bird, reptile and insect known to zoologists has just been begun by Dr. Neave.

The book, which will be used by scientists all over the world, is to be called the "Nomenclature Zoologica." It will take three years to compile.

Nothing so comprehensive has been produced since Linnaeus, the great Swedish scientist, compiled his *Nature* in 1758. Since then millions of new species have been discovered, and no fewer than 100,000 new generic names coined.

Native Dogs Among Indians

Early Explorers Made Reference To Types They Found

Early explorers of this continent, especially in Canada, were greatly interested in the native dogs they found among the redmen. The narratives of explorers and colonists from Mexico to Hudson Bay abound in references to or descriptions of the various types of these animals they saw, and of the uses, customs and fashions in which they figured. One of the most interesting early accounts is in Charlevoix's *Journal* of his travels in Canada during (1730-32), and an old-fashioned English translation of it follows:

I forgot, Madam, to tell you that the Savages always carry a great number of dogs with them when they hunt; they are the only domestic creatures which they bring up, and they bring them up only for hunting. They all seem to be of the same species. Their ears stand upright; their nose is long, like that of a wolf; but they are very faithful and attached to their masters; who, nevertheless feed them but poorly, and never fondle them. They are sometimes called by that kind of chase they are intended for, and they are excellent hunters.

Not Made Yet

The teacher was trying to give her pupils an illustration of the word "perseverance."

"What is it," she asked, "that can carry a man along rough roads and smooth roads, up the hills and down the hills—across the valley and through the pass, through the mighty jungle, swamps, deserts and raging torrents, across the sun-drenched waste and the wind-swept plain?"

"Please, teacher," said one lad, "there isn't such a car."

U.S. Has Gold To Sell

Secretary of the Treasury Henry Morgenthau said the United States government is prepared to sell gold to countries that can offer an attractive proposition. "We've got all the gold we can possibly use," Morgenthau added, indicating that the government would make no further uneffort to accumulate the metal.

Gave World Moving Picture

Frenchman Showed First One At Paris In 1895

Louis Lumiere, one-time tintype photographer, finally himself recognized to talking pictures. March 22 was the 40th anniversary of his gift of the motion picture to the world.

A roomful of astonished French manufacturers witnessed on March 22, 1895, what is now considered the birth of the movie as we know it.

One of them waved a hand. The gas lights were turned down, and on a white wall flickered human figures. They walked forward. The figures were working men leaving the Lyon factory of Louis and Auguste Lumiere, the young brothers who had invented and developed the first projector.

Louis Lumiere, generally credited with the invention, is 70 years old, and Auguste, who so closely aided him that separation of their work is difficult, is 72. Louis was visiting in Rome so there was no special observance of the anniversary.

Louis a month ago demonstrated before the French Academy of Science his latest contribution to what is now the talkie—three-dimensional pictures. Auguste, who abandoned photography for other branches of science, is distinguished for his work in biology, physiology, bacteriology and medicine.

Not Anxious To Go

Mose was in the war. At every explosion he strove for the rear line. His colonel talked to him thus:

"You shouldn't be afraid, Mose. Why, what if you die. Heaven's your home."

"Yassuh, ah knows. But ah ain't homesick."

Canada's Contribution

New Hen Has Been Evolved From Barred Plymouth Rock

Canada has contributed materially to the making of what is claimed as a new hen which has been evolved by agricultural scientists at Cambridge University, England. The bird at the moment is the object of considerable attention in the Old Country, and concerning it the "Spectator" says—"Few successes of greater interest and practical possibilities have been won in the field of agricultural biology than the making of the new Cambridge hen. Her chicks declare their sex at birth, because the males and females are differently marked. This is a great advantage to the poultry industry, since chicks travel early and well only during the first two days of their life. The new breed, known as Camber, was developed by Dr. R. C. Punnett, and his associates at Cambridge, England, by the application of Mendelian principles. By the use of the Canadian Barred Plymouth Rock (supplied by the University of British Columbia to Cambridge University) both silver and golden Cambers have been evolved. They are prolific layers of large coloured eggs, whilst still possessing the virtue of sex-linked chicks. These chicks mark an epoch in the scientific breeding of poultry."

Health Plan For B.C.

Scheme To Be Laid Before People For Discussion

A draft health insurance plan for British Columbia which may be introduced at a future session, was explained to the British Columbia legislature by Hon. G. M. Weir, provincial secretary.

The scheme will be laid before the public for full discussion and opportunity given for expression of opinion by all interested parties.

The plan is designed to establish a system of health insurance which will provide protection against the hazards of illness for every large section of the people unable to budget individually for adequate health services or bear the loss of income caused by illness.

And Tend It Carefully

Sandy (entering nursery garden): Have ye a nice cucumber?"

Gardener: "Aye, here's one. That will be five pence."

Sandy: "Too much. Have ye no one for tuppence?"

Gardener: "Ye can have this for tuppence."

Sandy: "All right, here's the tuppence. But don't let it off; I'll be calling for it in about a fortnight."

Donates Many Flags

Rai Bahadur Seth Sukhlal Karnal, a rich banker and landowner of Bengal, has donated 15,000,000 bangles flags for use on flag collection days to be held in India in connection with King George's Silver Jubilee Fund. In 1917 Rai Bahadur Karnal donated 10,000,000 flags for an "Our Day" Red Cross campaign; when over \$1,500,000 was raised.

1934 Wheat Crop

According to the third and latest computation, the Canadian wheat crop for 1934 is now estimated at 275,849,000 bushels. The revised estimate for 1933 is 281,882,000 bushels. The 1934 wheat crop is now placed at 48,095,000 cwt., compared with 42,745,000 cwt. in 1933.

Spain will loan nearly \$14,000,000 to small farmers at low rates.

LADY ASTOR TO QUIT

Native Daughter of Virginia, and the first woman to sit in the British House of Commons, has indicated that she will retire from public life at the end of her present term. She has represented the constituency of Plymouth since 1919 and has been one of the most publicized Liberals in the British House.

Lady Astor, native daughter of Virginia, and the first woman to sit in the British House of Commons, has indicated that she will retire from public life at the end of her present term. She has represented the constituency of Plymouth since 1919 and has been one of the most publicized Liberals in the British House.

Lady Astor, native daughter of Virginia, and the first woman to sit in the British House of Commons, has indicated that she will retire from public life at the end of her present term. She has represented the constituency of Plymouth since 1919 and has been one of the most publicized Liberals in the British House.

Fruit And Vegetable Products

Great Increase In Demand For Canadian Canned Goods

Representing a corresponding increase in the demand for Canadian canned fruits and vegetables, the volume of fruit and vegetable preparations produced in the Dominion increased about 100 per cent. during the period 1923-33. The industry engaged in the production of preparations from fruits and vegetables includes establishments specializing not only in canning, evaporating, and preserving these products but also in manufacturing vinegar, cider, pickles, catsup, sauces and other commodities of that kind. The most important branch of the industry is the canning of fruits and vegetables which is carried on most extensively in Ontario, British Columbia, and Quebec where the climatic conditions for the growing of fruits and vegetables are favourable.

The principal fruits canned in Ontario are apples, pears, plums, peaches, cherries, currants, gooseberries, blueberries, raspberries and strawberries. In the Dominion, British Columbia has the apricot and the loganberry. The vegetables canned include tomatoes, peas, corn, beans, beets, carrots, pumpkins, squash, spinach, and asparagus. The canning season begins in June and continues until October and is at its height in July, August, and September. The development of this industry has effected great changes in the relation of foods to seasons. Canned fruits and vegetables are to be obtained all the year round.

CARD OF THANKS

Mrs. F. H. Taylor and the Duncan children: Mr. and Mrs. Fred Taylor; Mr. and Mrs. Harry Taylor; Mr. and Mrs. R. Kinley, and John Taylor, wish to thank the many friends who so kindly rendered assistance during the illness and since the death of F. H. Taylor. They wish especially to thank those who sent floral tokens of regret, and assure them their thoughtfulness is deeply appreciated.

TENDERS FOR COAL

SEALED Tenders addressed to the undersigned and endorsed "Tender for Coal" will be received until 12 o'clock noon (daylight saving), Tuesday, May 14, 1935, for the supply of coal for the Dominion Buildings and Experimental Farms and Stations, throughout the Province of Manitoba, Saskatchewan, Alberta and British Columbia.

Forms of tender with specifications and conditions attached can be obtained from the Purchasing Agent, Department of Public Works, Ottawa; the District Resident Architect, Winnipeg, Man.; the District Resident Architect, Regina, Sask.; the District Resident Architect, Calgary, Alta.; and the District Resident Architect, Victoria, B.C.

Tenders will not be considered unless made on the form supplied by the Department and in accordance with departmental specifications and conditions.

The right to demand from the successful tenderer a deposit, not exceeding 10 per cent. of the amount of the tender, to secure the proper fulfillment of the contract, is reserved.

By order,
N. DESJARDINS,
Secretary,
Department of Public Works,
Ottawa, April 15, 1935

TO RENT
Modern 6-roomed house; veranda, lawn, kitchen garden, well, piped furnace, bath-room complete. Garage. Rent \$16.00. Frazer-McDonald.

MORTGAGE SALE OF FARM PROPERTY
Pursuant to the directions of the Registrar and by virtue of the Power of Sale provided by "The Land Titles Act" under a certain mortgage which will be produced at the time of the sale.
There will be offered for sale by public auction at the Post Office in the town of Lacombe in the Province of Alberta, on
SATURDAY, the 11th May, 1935

at the hour of 2:30 o'clock in the afternoon, the following property, namely:
The South East quarter of Section 26 in Township 41, Range 23, West of the 4th Meridian, containing by measurement 160 acres, more or less, and subject to the reservations and provisions contained in the Patent from the Crown, excepting thereout all mines, minerals, gas, petroleum and valuable stone.

Terms of sale to be ten per cent. cash at the time of the sale and the balance according to the terms and conditions to be made known at the time of sale or upon application to the vendor's solicitors.

The above property will be offered for sale subject to a sealed reserved bid and free from all encumbrances, save taxes for the current year.

The vendor is informed that the above property is situated about 14 miles from the town of Lacombe at which point is the nearest Post Office. The nearest grain elevator is at Gull Lake, 6½ miles distant from the property, and the nearest school is one-half mile distant from the property.

The land contains 160 acres of which 110 acres are under cultivation. There are approximately 50 acres of brush and 30 acres of land seeded to broom. All of the property could be cultivated if cleared.

The soil is a black loam, part chocolate, six inches to two feet deep, with clay subsoil.

There is a drilled well on the property.

The property is all fenced, and 3-4 of a mile is cross fenced, with 3 and 3 strands of barbed wire, and poplar and tamarac posts.

Buildings on the property are:
1 frame dwelling with shingle roof, 24x24.
1 frame barn with shingle roof, 20 x 30.
1 frame hen house, board roof, 12 x 12.
1 frame hog house, board roof, 12 x 36.
1 frame and slab granary, board roof, 12 x 16.
1 frame well house, no roof.

For further particulars and conditions of sale, apply to Messrs. Newell, Lindsay, Emery & Ford, Barristers, Canada Permanent Building, Edmonton.
Dated at Edmonton, in the Province of Alberta, this 3rd day of April A.D. 1935.
Approved "A. T. Kinnaird," Dep. Registrar.

CREAMERY AT BLUFFTON

An up-to-date creamery has recently been erected at Bluffton, nine miles north of Timbimby. It is owned by Montabetti Brothers, general merchants of Bluffton.

The new Community Hall at Bluffton is rapidly nearing completion and will be opened during the early summer.

Two cars of hay, one of straw, and one of feed oats have been received at Bluffton and distributed from that point. Mr. Fred Marriot, is assisting at the platform.

Recommendation that Regal and Wisconsin No. 38 Be
BARRIED FROM MALTING GRADES

At the recent meetings of the Grain Research Committee held in Winnipeg, a recommendation was forwarded to the Board of Grain Commissioners that the smooth awn barley at present licensed for sale be classed as seed barley and kept out of the malting grade, I.C.W., 2 C.W. and of Three Extra Six Row.

Malting tests made at the Malting Laboratory, Manitoba Agricultural College, which is operated by the University of Manitoba and the Federal Department of Agriculture show that the Wisconsin No. 38 is O.A.C. No. 21 which is taken as the standard in the Three Extra Grade. Regal malt is slightly lower in malt extract than O.A.C. No. 21 and very much lower in the enzyme diastase than O.A.C. No. 21.

The diastase content is very important in malt used in the manufacture of medicinal malt extract. Diastase is responsible for changing the starches of the malt into barley sugar.

Local maltsters have reported that smooth awn barley are not suited to their wants because of the fact that the hull peels off very easily during threshing and later during the manufacturing process.

Persons who wish to grow malting barley during the coming summer would be well advised to avoid using smooth awn barley. O.A.C. No. 21 is considered the most satisfactory malting barley for both domestic and export trade.
